

AI Agent Insure

Customer Service Product Guide: Agentic Workflow Uptime Insurance

1. High-Level Summary

Focused on keeping autonomous, multi-step AI workflows available, reliable, and resilient.

2. Who This Product Is Appropriate For

- Organizations with end-to-end processes orchestrated by agents (e.g., ticket routing, triage, automated ops).
- Teams using chained tools, APIs, and agents to execute business-critical tasks.
- Platforms offering agentic automation as a service to customers.

3. What This Product Covers

- Losses linked to prolonged workflow downtime or repeated agent failures.
- Coverage for failed tool calls, context retrieval errors, and orchestration breakdowns.
- Support for root-cause analysis to prevent recurrence of workflow failures.
- Optional linkage to SLAs for end-customer commitments.

4. Optional Coverage Add-ons

- Different coverage tiers based on workflow criticality (non-critical vs. mission-critical).
- Add-ons for multi-region redundancy and failover design reviews.
- Performance benchmarking of key workflows with improvement recommendations.
- Joint exercises to map and prioritize agentic workflows for protection.

5. Common Exclusions (High-Level)

- Manual process interruptions unrelated to AI workflows.
- Workflows still in experimental or lab-only stages without defined SLAs.
- Downtime caused by upstream third-party outages outside agreed scope.

- Non-material performance issues that do not impact outcomes.

6. Example Customer Scenarios & Positioning Tips

- An automated triage agent fails to route high-priority tickets, causing major backlog.
- A context-retrieval failure stops an AI-driven claims-intake process for several hours.
- A broken tool integration prevents an agent from completing end-to-end onboarding flows.

7. Common Caller Questions & Suggested Discovery Prompts

- Which workflows in your business are currently agent-driven or automated with AI?
- What happens to customers or internal teams if those workflows stop working?
- Do you have defined SLAs or uptime expectations for these workflows?
- Have you mapped all tools and APIs that your agents depend on?

8. Key Data to Capture During the Call

When discussing this product with a prospective customer, Customer Service Agents should aim to capture:

- The caller's role and decision-making authority.
- The types of AI systems or workflows currently in use or planned.
- Any recent or historical incidents or near-misses involving AI.
- Regulatory or contractual constraints the customer operates under.
- Business processes that would be most impacted by AI failure or misbehavior.
- Any existing insurance coverage the customer already has for technology or cyber risk.
