

AI Agent Insure

Customer Service Product Guide: Autonomous System & Robotics Coverage

1. High-Level Summary

Coverage for AI-driven physical or digital autonomous systems, including autonomous vehicles, drones, and robotics.

2. Who This Product Is Appropriate For

- Companies running AV fleets, warehouse robots, delivery robots, or drones.
- Manufacturers or operators of industrial robots used in logistics, manufacturing, or healthcare environments.
- Startups piloting autonomous systems in controlled or semi-controlled environments.

3. What This Product Covers

- Liability for bodily injury or property damage caused by autonomous systems.
- Coverage for collisions, navigation failures, and misinterpreted sensor data.
- Protection against malfunctions arising from software updates or AI model changes.
- Optional coverage for business interruption due to system-wide outages or stand-downs.

4. Optional Coverage Add-ons

- Fleet-based coverage with per-unit and aggregate limits for AVs and robots.
- Add-on for regulatory compliance support and documentation reviews.
- Downtime coverage for critical operations relying on robotics and AVs.
- R&D; and pilot program endorsements for test environments.

5. Common Exclusions (High-Level)

- Manual override incidents clearly attributable to human operator negligence.
- Use of robots or AVs outside approved environments or geographies.
- Unlicensed or unregistered operation where regulation requires it.

- Hardware modification not authorized by the manufacturer.

6. Example Customer Scenarios & Positioning Tips

- A warehouse robot collides with shelving, causing inventory loss and operational delays.
- A delivery robot mis-navigates and damages property in a lobby or storefront.
- An AV in a pilot program is involved in a minor collision due to misinterpreted road markings.

7. Common Caller Questions & Suggested Discovery Prompts

- What types of autonomous systems are you operating (robots, AVs, drones)?
- Are these systems in production, pilot, or R&D; stages?
- Where are you operating them (on-premise warehouses, public roads, private campuses)?
- How are incidents currently logged and handled when something goes wrong?

8. Key Data to Capture During the Call

When discussing this product with a prospective customer, Customer Service Agents should aim to capture:

- The caller's role and decision-making authority.
- The types of AI systems or workflows currently in use or planned.
- Any recent or historical incidents or near-misses involving AI.
- Regulatory or contractual constraints the customer operates under.
- Business processes that would be most impacted by AI failure or misbehavior.
- Any existing insurance coverage the customer already has for technology or cyber risk.
