

2 Claims Intake Guide

This guide supports customer service agents collecting claim information.

Required steps:

1. Identify the AI system involved.
2. Capture timestamps, workflow state, and system logs (if available).
3. Determine downstream business or customer impact.
4. Escalation triggers for high-severity incidents.

Data to Capture:

- System behavior summary
- Affected customers
- Financial impact
- Screenshots or event logs (internal only)
