

AI Agent Insure

Board of Directors

Dr. Amina Rahman – Chairperson

Dr. Rahman is a globally recognized pioneer in AI governance, algorithmic ethics, and autonomous decision-making system accountability. She previously led Responsible AI at a Fortune 100 company where she oversaw enterprise standards for AI safety, model explainability, and bias mitigation. She has advised international regulatory bodies on AI oversight and serves as a mentor for emerging AI ethics scholars. At AI Agent Insure, she guides strategic direction, ensures responsible underwriting models, and anchors the company's mission of safe agentic innovation.

Jonathan Park – Director, Insurance & Actuarial Sciences

With three decades of experience across actuarial science, risk modeling, and digital-first insurance frameworks, Jonathan is one of the earliest adopters of AI-augmented actuarial methods. He previously served as Chief Actuary at a major global insurer where he helped pioneer ML-based loss modeling. His expertise ensures AI Agent Insure's underwriting models are both mathematically rigorous and aligned with real-world risk behaviors of autonomous systems.

Dr. Liwen Zhou – Director, AI Systems Engineering

A distinguished AI architect with expertise spanning LLMs, RAG pipelines, multi-agent workflows, and distributed inference systems. Dr. Zhou previously led ML platform engineering at a top cloud provider. Her research in agent-orchestration reliability is foundational to the evaluation frameworks used by AI Agent Insure to assess agent-driven operational exposure and cascading system dependencies.

Elena Martínez – Director, Autonomous Mobility & Robotics

Elena is an internationally recognized expert in autonomous mobility and robotics safety. She played a major role in drafting early autonomous-vehicle compliance standards in the EU and Latin America. Her experience spans field robotics, AV sensor fusion reliability, and robotic labor-replacement risk. She ensures the company remains at the forefront of insuring physical autonomous systems.

Marcus Feld – Director, Cybersecurity & Data Protection

A former Fortune 50 CISO, Marcus is an authority on adversarial ML security, model exfiltration prevention, and data pipeline integrity. He has led red team operations for several high security AI deployments. At AI Agent Insure, he strengthens the company's ability to model cyber-AI hybrid vulnerabilities—an increasingly common source of agentic system failure.

Sofia Okoye – Director, Ethics & Global Compliance

Sofia has shaped AI regulatory frameworks across multiple continents. She has served on NIST working groups, contributed to EU AI Act consultation sessions, and developed compliance systems for high risk AI deployments in finance and healthcare. She ensures AI Agent Insure's products remain globally compliant and future proof against evolving regulations.

Dr. Naomi Bennett – Director, Synthetic Data & AI Research

Dr. Bennett is one of the world's leading researchers on synthetic datasets, generative data engines, and bias reduction techniques. Her publications on dataset lineage and reidentification defense are widely cited. She ensures the company's dataset risk evaluations remain scientifically rigorous.

Darius Cole – Director, Finance & Capital Strategy

Former partner at a major private equity firm focused on insurtech, fintech, and emerging risk markets. Darius specializes in capital provision for high growth technology insurers and has architected financial strategies for several AI driven insurance products. He guides AI Agent Insure's long term sustainability and capital expansion planning.
