

AI Agent Insure

Executive Leadership Team

Dr. Amina Rahman – Chief Executive Officer (CEO)

As CEO, Dr. Rahman drives AI Agent Insure's mission to become the world's leading insurer for agentic and autonomous AI systems. She sets long-term strategy, oversees regulatory alignment, and ensures that innovation and responsibility remain core to the company's identity. Her background in global AI governance enables her to bridge technical, ethical, and business considerations.

Carlos Mendes – Chief Risk Officer (CRO)

Carlos leads the design of the company's AI-native risk modeling frameworks, ensuring coverage accurately reflects real-world agentic behaviors. He oversees underwriting strategy, emerging risk forecasting, and partnership development with enterprise AI teams evaluating liability exposures. His team develops proprietary scoring systems for autonomous workflow reliability.

Dr. Liwen Zhou – Chief Technology Officer (CTO)

Dr. Zhou oversees the development and evolution of the company's technical infrastructure—including model-based risk engines, RAG-driven knowledge systems, and AI-powered underwriting workflows. She manages engineering, data science, and agent simulation teams responsible for stress testing autonomous systems under realistic conditions.

Elena Martínez – Chief Operating Officer (COO)

Elena ensures the seamless operational delivery of AI Agent Insure's products. She leads global operations, customer onboarding, incident response coordination, and cross-team implementation. She is responsible for scaling AI-augmented claims processes and ensuring operational resilience.

Marcus Feld – Chief Information Security Officer (CISO)

Marcus directs the company's cybersecurity strategy with a focus on AI model security, adversarial threat defense, and infrastructure hardening. He oversees penetration testing against multi-agent systems, evaluates AI supply chain vulnerabilities, and ensures customer data is securely processed during risk assessments.

Sofia Okoye – Chief Compliance & Regulatory Affairs Officer (CCO)

Sofia ensures AI Agent Insure's offerings align with global regulatory expectations. She leads policy interpretation for high-risk AI systems, manages compliance audits, and partners with regulators to shape future AI insurance standards. She maintains internal governance systems used during underwriting.

Dr. Naomi Bennett – Chief Research & Innovation Officer (CRIO)

Dr. Bennett leads research into next-generation dataset validation, synthetic data integrity, automated bias correction, and model behavior auditing. Her group develops technical frameworks used to evaluate model reliability for underwriting purposes.

Darius Cole – Chief Financial Officer (CFO)

Darius manages company capital, financial planning, investor relations, and long-term revenue strategy. He structures new insurance products, evaluates market expansion opportunities, and ensures financial resilience across high-risk AI coverage lines.
