

AI Agent Insure

Insurance for Agentic AI Builders

Agentic AI Liability Insurance

Overview

Protects organizations deploying autonomous or semi-autonomous AI agents from unintended harmful decisions, misinformation, operational failures, or unpredictable agent behaviors.

Key Coverage Details

- Covers harm caused by AI hallucinations, misaligned decision-making, or autonomous task execution.
- Includes protection against regulatory penalties, customer impact, operational disruption, and legal liability.
- Supports post-incident forensic analysis, agent behavior tracing, and AI system stabilization.

Real-World Scenarios in Agentic AI Environments

- A customer-facing agent gives incorrect financial advice causing monetary loss.
- An internal decision-making agent triggers an unauthorized workflow affecting thousands of accounts.
- An AI system hallucinates compliance-related information leading to a regulatory investigation.
