

AI Agent Insure

Insurance for Agentic AI Builders

Agentic Workflow Uptime Insurance

Overview

Ensures reliability and continuity for businesses relying on autonomous multi-agent workflows.

Key Coverage Details

- Covers agent downtime, failed tool calls, and long-context retrieval breakdowns.
- Protection for orchestration failures, API routing errors, and dependency outages.
- Includes proactive workflow resilience reviews.

Real-World Scenarios in Agentic AI Environments

- A mission-critical agent fails to retrieve context, halting an entire AI pipeline.
- Tool-calling failures cause customer requests to stall.
- A faulty orchestration layer misroutes tasks, breaking a multi-agent chain.
