

AI Agent Insure

Insurance for Agentic AI Builders

Autonomous System & Robotics Coverage

Overview

Insurance for businesses deploying physical or digital autonomous systems including robots, drones, AVs, and industrial automation units.

Key Coverage Details

- Covers navigation failures, sensor degradation, robotic malfunctions, and collision liabilities.
- Includes protection for hardware-software integration issues and unexpected autonomous operations.
- Optional downtime coverage protects against operational revenue loss.

Real-World Scenarios in Agentic AI Environments

- A warehouse robot collides with inventory due to a faulty navigation update.
- A delivery drone loses GPS signal and lands in an unsafe area.
- A robotic arm misinterprets sensor input and damages expensive equipment.
