

AI Agent Insure

Insurance for Agentic AI Builders

Intellectual Property & Output Protection

Overview

Safeguards organizations from legal and ownership risks associated with AI-generated outputs.

Key Coverage Details

- Protection against copyright claims related to AI-generated content.
- Covers derivative work disputes and trademark-related risks.
- Includes safe-generation audits and output traceability assessments.

RealWorld Scenarios in Agentic AI Environments

- An AI system generates content too similar to a copyrighted source.
- A client disputes ownership of outputs created by a multi-agent workflow.
- Model hallucination leads to accidental use of protected brand trademarks.
