

# AI Agent Insure

## Customer Service Product Guide: Agentic AI Liability Insurance

### 1. High-Level Summary

Covers harm caused by autonomous or semi-autonomous AI decisions, including hallucinations, misaligned actions, and faulty recommendations.

### 2. Who This Product Is Appropriate For

- Companies deploying AI copilots for customer support, sales, finance, or internal decision support.
- Vendors building agentic AI platforms used by multiple downstream customers.
- Enterprises experimenting with autonomous or semi-autonomous decision flows (e.g., approvals, routing, recommendations).

### 3. What This Product Covers

- Liability for financial, operational, or reputational harm caused by AI outputs or decisions.
- Coverage for incorrect, misleading, or hallucinated responses from AI agents that impact customers or partners.
- Defense costs and settlements related to claims that an AI system caused loss or damage.
- Coverage for internal process failures triggered by autonomous agents (e.g., misrouted workflows, incorrect account changes).

### 4. Optional Coverage Add-ons

- Higher limits for large enterprise deployments or critical decision systems.
- Add-on for regulatory investigation support when AI behavior triggers inquiries or audits.
- Reputation management and PR support following high-visibility AI incidents.
- Coverage extensions for partner or reseller use of the insured's AI agents.

### 5. Common Exclusions (High-Level)

- Intentional misuse or deliberate override of AI safeguards by the customer.

- Systems operating entirely outside the declared AI footprint or disclosed use cases.
- Non-AI related business decisions unrelated to the AI's recommendations.
- Known defects that were not remediated after prior incidents or warnings.

## **6. Example Customer Scenarios & Positioning Tips**

- A sales copilot recommends an incorrect pricing tier to dozens of customers, leading to revenue loss and complaints.
- An internal approval agent auto-approves transactions that should have been flagged, causing financial exposure.
- A support bot gives misleading policy information that causes a customer to make a costly decision.

## **7. Common Caller Questions & Suggested Discovery Prompts**

- What kinds of AI agents are you using today (customer-facing, internal, or both)?
- Where does your AI directly influence customer or financial outcomes?
- Have you experienced any incidents where AI recommendations were clearly wrong or harmful?
- Do you sell or license AI tools to external customers, or are they only used internally?

## **8. Key Data to Capture During the Call**

When discussing this product with a prospective customer, Customer Service Agents should aim to capture:

- The caller's role and decision-making authority.
- The types of AI systems or workflows currently in use or planned.
- Any recent or historical incidents or near-misses involving AI.
- Regulatory or contractual constraints the customer operates under.
- Business processes that would be most impacted by AI failure or misbehavior.
- Any existing insurance coverage the customer already has for technology or cyber risk.
