

AI Agent Insure

Customer Service Product Guide: Compliance & Regulatory Shield

1. High-Level Summary

Supports organizations facing regulatory, audit, and documentation obligations related to AI deployment.

2. Who This Product Is Appropriate For

- Enterprises operating in regulated sectors such as finance, healthcare, or mobility.
- Companies deploying high-risk AI systems under frameworks like the EU AI Act.
- Organizations needing robust documentation for AI governance, explainability, and model oversight.

3. What This Product Covers

- Costs and penalties arising from AI-related regulatory inquiries or findings (where insurable).
- Support for documentation, model-risk reporting, and policy reviews.
- Coverage for remediation efforts required by regulators after AI incidents.
- Access to experts specializing in AI compliance frameworks and standards.

4. Optional Coverage Add-ons

- Pre-deployment AI risk and compliance assessments.
- Ongoing monitoring support for high-risk AI portfolios.
- Sector-specific compliance modules (e.g., KYC/AML, medical devices, AV safety).
- Training and workshops for internal governance committees.

5. Common Exclusions (High-Level)

- Deliberate non-compliance or ignoring explicit regulatory directives.
- Fraudulent reporting or misrepresentation of AI usage.
- Activities clearly outside regulatory boundaries (e.g., unlicensed operations).

- Non-AI compliance issues unrelated to declared AI systems.

6. Example Customer Scenarios & Positioning Tips

- A regulator demands detailed documentation for a credit-approval model's decision logic.
- An audit finds gaps in monitoring of an AV safety stack, requiring remediation and reporting.
- A healthcare AI tool is reclassified as high-risk, triggering new obligations and costs.

7. Common Caller Questions & Suggested Discovery Prompts

- Which regulators or frameworks are most relevant to your AI systems?
- Do you classify any of your AI as high-risk under existing or emerging laws?
- How do you document model behavior, updates, and approvals today?
- Have you already been through any AI-related audits or regulatory reviews?

8. Key Data to Capture During the Call

When discussing this product with a prospective customer, Customer Service Agents should aim to capture:

- The caller's role and decision-making authority.
- The types of AI systems or workflows currently in use or planned.
- Any recent or historical incidents or near-misses involving AI.
- Regulatory or contractual constraints the customer operates under.
- Business processes that would be most impacted by AI failure or misbehavior.
- Any existing insurance coverage the customer already has for technology or cyber risk.
