

AI Agent Insure

Customer Service Product Guide: Incident Response & AI Crisis Management

1. High-Level Summary

Provides rapid support and coverage when AI systems fail, misbehave, or cause real-world impact.

2. Who This Product Is Appropriate For

- Organizations with customer-facing or business-critical AI systems.
- Enterprises concerned about public incidents, media attention, or large-scale AI failures.
- Teams wanting a clear, rehearsed plan for AI incident response.

3. What This Product Covers

- 24/7 access to AI incident-response specialists and coordination support.
- Coverage for investigation, containment, and root-cause analysis of AI failures.
- Reputation and communications support for customer and public messaging.
- Operational recovery assistance, including temporary workarounds or fallbacks.

4. Optional Coverage Add-ons

- Tabletop exercises and simulation workshops for AI incident preparedness.
- Customized crisis playbooks aligned with customer's architecture and risk profile.
- Extended coverage for multi-party incidents across partner ecosystems.
- Integration with the customer's existing SOC or incident-response team.

5. Common Exclusions (High-Level)

- Events entirely unrelated to AI systems or agent workflows.
- Incidents caused solely by physical disasters without AI involvement.
- Repeated incidents where agreed remediation steps were not implemented.

- Non-cooperation with investigation or root-cause analysis.

6. Example Customer Scenarios & Positioning Tips

- A customer-facing AI agent pushes misleading updates to thousands of users in minutes.
- A bug in an orchestration layer causes agents to repeatedly trigger a costly internal action.
- A viral social media thread exposes harmful behavior from a deployed chatbot.

7. Common Caller Questions & Suggested Discovery Prompts

- Do you have a documented AI incident-response plan today?
- Who is responsible when something goes wrong with an AI system?
- How quickly can you disable, roll back, or reconfigure agents in production?
- Are you concerned about reputational risk from AI missteps?

8. Key Data to Capture During the Call

When discussing this product with a prospective customer, Customer Service Agents should aim to capture:

- The caller's role and decision-making authority.
- The types of AI systems or workflows currently in use or planned.
- Any recent or historical incidents or near-misses involving AI.
- Regulatory or contractual constraints the customer operates under.
- Business processes that would be most impacted by AI failure or misbehavior.
- Any existing insurance coverage the customer already has for technology or cyber risk.
