

AI Agent Insure

Customer Service Product Guide: Intellectual Property & Output Protection

1. High-Level Summary

Helps manage IP and ownership risks associated with AI-generated outputs and content.

2. Who This Product Is Appropriate For

- Companies using AI to generate text, images, code, or designs for customers.
- Agencies or platforms offering generative AI services as part of their business model.
- Enterprises worried about copyright, trademark, or trade-secret implications of AI output.

3. What This Product Covers

- Claims that AI-generated content infringes on third-party intellectual property.
- Disputes over ownership of AI-generated work between the company and its clients.
- Accidental disclosure of trade secrets through AI-generated or suggested content.
- Support for takedowns, remediation, and legal defense related to disputed outputs.

4. Optional Coverage Add-ons

- Specialized coverage for creative industries (media, design, entertainment).
- Add-ons for software code generation and open-source license conflicts.
- Joint review processes with legal teams for high-risk use cases.
- Content review and governance workshops for internal stakeholders.

5. Common Exclusions (High-Level)

- Knowingly copying or reproducing protected content without transformation or rights.
- Manual overrides that bypass safeguards clearly designed to avoid infringement.
- Use of AI to intentionally replicate competitor IP.
- Pre-existing IP disputes unrelated to AI-generated content.

6. Example Customer Scenarios & Positioning Tips

- A marketing team uses AI to generate a campaign visual that resembles a known brand asset.
- A customer disputes whether they or the vendor own AI-generated code delivered as part of a project.
- An AI assistant suggests code snippets under a license incompatible with the customer's product.

7. Common Caller Questions & Suggested Discovery Prompts

- What types of content are you generating with AI today?
- Are outputs delivered directly to customers, or used internally?
- Do you have existing IP or legal guidelines for using AI-generated content?
- Have any concerns or disputes arisen yet around AI-generated work?

8. Key Data to Capture During the Call

When discussing this product with a prospective customer, Customer Service Agents should aim to capture:

- The caller's role and decision-making authority.
- The types of AI systems or workflows currently in use or planned.
- Any recent or historical incidents or near-misses involving AI.
- Regulatory or contractual constraints the customer operates under.
- Business processes that would be most impacted by AI failure or misbehavior.
- Any existing insurance coverage the customer already has for technology or cyber risk.
